ALCON,

BLUF:

It takes a few weeks to amend the multi-site IA to add Special Acct (SA) funding if it wasn't created from a prior amendment. My question who is the COR that creates the new Task/Work Orders so I can add funding i.e. TO-03?

Mr. Sanchez,

Sir, I spoke with Mr. Miller and he stated Special account funding is the prime choice to add \$50k to the new WAF. Currently, the multi-site IA doesn't have SA listed on San Jacinto site (Ms. Gee was with me looking over financial info). If that's the case, I will have to amend the multi-site IA and that process can take a few weeks to a month to go through the necessary channels for review and approval because the IGMS system is scheduled to be down starting Friday 04FEB15. I've looked through previous notes and Mrs. Robinson added \$100k of Pipeline funds on Amendment#3. Then we added \$200k Pipeline to Amendment #4. My plan is to issue the WAF with pipeline monies and then make Amendment#5 to include SA funds – then reprogram from T to TR2B.

Please advise...

Very Respectfully,

Kellon Pearson

Kellon,

I just talked with Gary and he stated that he had discussed with you the new work and funding that will be used for this work by the Corps. CAS

Kellon,

I will wait for Gary to response to your email and provide information.

However, it is my understanding that this is new work, different/separate from the current work, for the San Jacinto site that the Corps is conducting.

Also, the requested funding is specific to this new work and not to increase the current funding for the task the Corps is working on. CAS

Sir,

Just to clarify, are we only changing your SOW Scope (Amending) or are you increasing funding on this project?

Kellon,

As we discussed, here is the SOW and cost estimate for an IA with the Army Corps of Engineers. Please set the IA up so that they can begin working on the assessment of the repaired cap area. Please let me know if you have any questions on this.

Thanks,

Gary Miller
